After Repairs and Painting**

Project I – Flat Cars

***AAR Certified Repair Work In Progress at Excel Shop in Kenney**

Excel arranged and facilitated a multimillion dollar sale of 111 bulkhead flat railcars to a major steel manufacturing company, including the modification and repairs, adding value to the assets with an extended service life of the railcars.

EXCEL RAILCAR SERVICES, INC.

Project II– Flat Cars

Excel Railcar Services, Inc. in Kenney, Illinois recently completed a project to modify a flat car by reducing its size. We spliced 11 feet off the center and welded the two parts together for a smaller, customized railcar per our customer specifications.

Modification of a Flat Car (Reduction in size)

**A Completed Customized Flat Car
Ready for painting and return to service.**

**A Completed Customized and Painted Flat Car
Ready to return to service.**

This modification has been done with Excel's engineering design and approved by the Association of American Railroads, Engineering and Mechanical Division.
